STARCLASSIC WALNUT/BIRCH

Lacquer Finishes

Exploring limitless possibilities, our result in the wake of countless experimentation came in the form of the Hybrid Shell Walnut/Birch: combining the superior quality warmth and mid to low frequency tone of the increasingly popular and truly unique Walnut, with the well-defined and uncompromisingly solid attack of Birch. Whilst we successfully preserved their unique sonic trademarks, the characteristics of both Walnut and Birch blend to persuade a very focused sound that would define itself with great distinction within a musical ensemble; married with controlled sustain and clarity; all sealed with an undeniably palpable feeling of warmth and resonance when performed.

S.L.P. DRUM KITS -STUDIO MAPLE-

Lacquer Finish

The Studio Maple kit is very original model in both sound and appearance, with Sound Focus Rings on the inside of the shells and 100% Maple Wood Hoops. It has a focused, warm, woody tone with clear attack, and a relatively short sustain with beautiful decay. While great for live performance, this model really excels in the studio, especially when seeking a warm sound with controlled resonance.

S.L.P. DRUM KITS -FAT SPRUCE-

Lacquer Finishes

The Fat Spruce kit features luxurious 100% Spruce shells, which is rarely used as a material on complete drum sets. Its unique sound is fat and open with solid mids and a natural, acoustic vibe not found in more common materials. Furthermore, by utilizing die-cast hoops, it provides a very crisp, focused sound.

This kit is also very versatile with a wide tuning range – can go low to medium, optimal for R&B, Blues, and Ballads, or tuned higher to work really well for Jazz and Indie Rock.

S.L.P. DRUM KITS -DYNAMIC KAPUR-

Lacquer Finishes

This model features Kapur material, which has caught many drummers’ attention for its solid, focused sound and rich mid-range. We paired it with our Sound Arc Hoops for plenty of attack and moderately controlled overtones of the Kapur shells. It offers warm resonance and a very natural, comfortable feel. Because of its slightly dry sound and enhanced attack, it works very well for funk, fusion and gospel. The high volume potential also lends itself perfectly to rock music.

SUPERSTAR HYPER-DRIVE DUO

Lacquer Finishes

Superstar Hyper-Drive Duo is a unique and exciting series which will bring new value to the current drumming world. Similar to the groundbreaking work we did with the Superstar Hyper-Drive’s extra shallow toms in 2008 - drawing inspiration from recent performances of cutting-edge drummers - we have once again created distinct drum setups which are poised to inspire drummers. Opening the door to new approaches to drumming beyond the standard. The key component of this series is the 10” x 14” snare drum, which we call the “Duo Snare”. This drum is unique not only because of its surprisingly 10” depth, but also because it is equipped with floor tom legs and brackets. You can place this drum in a position where the first floor tom would traditionally go. As such, the snare can function as a floor tom with the snares engaged, or as a 14” floor tom with the snares off. This can lead to many unique phrasing opportunities.

Once you experience playing on this new kit your eyes and ears will be opened to the infinite range of possibilities, plus it’s a lot of fun. Just try it.

SUPERSTAR CLASSIC MAPLE

Exotic Finishes

For more than forty years, the Superstar name has stood for groundbreaking design, superior build quality, sterling tone, and clear projection. Superstar Classic once again upheld tradition by raising the bar for discerning drummers—and remarkably—does it while also lowering the prices. Drawing on Superstar of the past, its classic TAMA T-shape badge and streamlined low-mass single lugs point to the simpler side of art of the 70’s, while the ingenious Star-Mount system and the thinner gauge 100% maple shells eclipse anything in its class.

#TAMA DRUMS AND HARDWARE
With over 40 years of drum building experience, TAMA knows what drummers really want. With this in mind, we sought out to design an affordable yet durable kit that retained many high-end features you find in our Superstar and Starclassic lines. What we came up with was Imperialstar. Every aspect of the modern drum kit was exhaustively examined, reexamined, and then improved before it was accepted as part of the Imperialstar design.

RHYTHM MATE

Unicolor Wrap Finishes

TAMA’s entry-level Rhythm Mate drum kit provides the precise bearing edges for easy tuning that beginners need and the wide tuning range that pros demand. TAMA’s original Accu-Tune Bass Drum Hoops offer faster, more consistent tuning than traditional metal hoops. And if that wasn’t enough, the hardware is equipped with double-braced legs for increased stability. TAMA Rhythm Mate drums are changing the way entry-level kits are designed.

CLUB-JAM

Lacquer Finish

The “Club-JAM” Kit adopts some ideas from vintage kits, such as a cymbal holder mounted directly on the bass drum shell and curved bass drum spurs, further setting it apart from the typical compact kit. Focused yet deep sound from Poplar shell is just right for small and intimate gigs. Its compact size and configuration make it ideal for working drummers, and it fits comfortably on just any stage.
