Drumsticks

The Nino Percussion Drumsticks are designed for young musicians learning their way around the drums. Scaled down from standard drumstick sizes, these sticks measure 14" long with a 0.520" diameter. This smaller size provides young players with a balanced feel, making the drumsticks easier to control than standard models. Just like most professional drumsticks, the Nino Percussion Drumsticks are made from durable American hickory and have a medium taper for a well-rounded bounce on all surfaces. Use the drumsticks to play on snare drum, cymbals or a whole drum set. An oval shaped wood tip draws out a great tone and attack on drums and cymbals. A final coating using a special mix of natural oils and waxes provides young players with a solid grip while maintaining a natural feel. Available in blue, red and green.

Features:

- Compact size for young drummers – 14" long, 0.520" diameter
- Use on drums and cymbals
- Made from durable American hickory
- Special coating for better grip
- Sold in pairs
